

KEGG waveform enrichment — male aligned vs misaligned WT

SMC

Fibroblast

- Endocytosis
- Antigen processing and presentation
- Steroid biosynthesis
- ErbB signaling pathway
- Gap junction
- VEGF signaling pathway
- Spliceosome
- Thyroid hormone signaling pathway
- Protein processing in endoplasmic reticulum
- Longevity regulating pathway
- Cocaine addiction
- Estrogen signaling pathway
- TGF-beta signaling pathway
- Non-alcoholic fatty liver disease
- GnRH signaling pathway
- Wnt signaling pathway
- Aldosterone synthesis and secretion
- Amphetamine addiction
- Oxytocin signaling pathway
- cAMP signaling pathway

- ECM-receptor interaction
- Cholesterol metabolism
- Phagosome
- Arachidonic acid metabolism
- Ether lipid metabolism
- Focal adhesion
- Steroid hormone biosynthesis
- TNF signaling pathway
- PI3K-Akt signaling pathway
- Drug metabolism
- Metabolism of xenobiotics by cytochrome P450
