

SMCFibroblastECMacrophage

Glycolysis / Gluconeogenesis

PPAR signaling pathway

Cell adhesion molecules (CAMs)

Cytokine-cytokine receptor interaction

Phospholipase D signaling pathway

Cell adhesion molecules (CAMs)

Platelet activation

Hippo signaling pathway

Vascular smooth muscle contraction

FoxO signaling pathway

Tight junction

Cholesterol metabolism

Steroid biosynthesis

Fatty acid degradation

Fluid shear stress and atherosclerosis

AGE-RAGE signaling pathway in diabetic complications

Gap junction

HIF-1 signaling pathway

Focal adhesion

Focal adhesion
