

KEGG waveform enrichment — male aligned bmal1-control

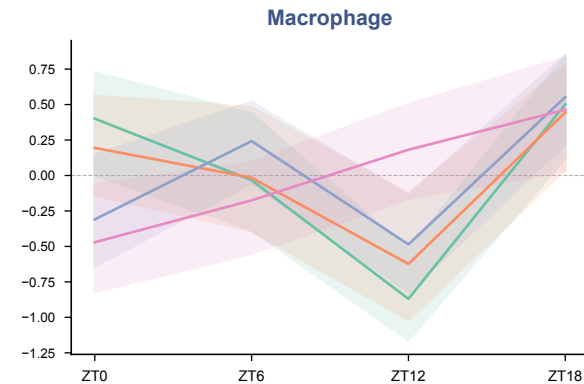

- African trypanosomiasis
- Glutathione metabolism
- Chemical carcinogenesis
- Glutamatergic synapse
- ErbB signaling pathway
- Mineral absorption
- Circadian entrainment
- Terpenoid backbone biosynthesis
- GABAergic synapse
- Drug metabolism

- Chemokine signaling pathway
- Circadian entrainment
- Protein processing in endoplasmic reticulum
- IL-17 signaling pathway
- Cardiac muscle contraction
- Drug metabolism
- Chemical carcinogenesis
- PI3K-Akt signaling pathway
- Metabolism of xenobiotics by cytochrome P450
- MAPK signaling pathway

- Complement and coagulation cascade
- cGMP-PKG signaling pathway
- Viral carcinogenesis
- Parathyroid hormone synthesis
- Cholesterol metabolism
- Wnt signaling pathway
- Protein digestion and absorption
- Adrenergic signaling in cardiac muscle
- Relaxin signaling pathway
- Axon guidance

- Cytokine-cytokine receptor interaction
- TNF signaling pathway
- C-type lectin receptor signaling pathway
- PI3K-Akt signaling pathway
